## 土 木 構 造 ・ 材 料 論 文 集

## JOURNAL OF STRUCTURES AND MATERIALS IN CIVIL ENGINEERING

第 30 号 2014 (Number 30, 2014)

## 目 次 CONTENTS

| 招待論文 INVITED PAPER  |   |         |
|---|---|---------|
| <br>  | <br>大塚 久哲                               |         |
| How to Design the Bridges in the Area of Seismic Faults   | By H. OTSUKA                            | 1       |
| 技術展望 REVIEW   |   |         |
| 日本の「まちづくり・くにづくり」におけるプラグマティズム不足<br>PRAGMATISM: what we need for urban and national management in Japan   | 藤井 聡<br>By S. FUJII                     | 7       |
| 講演論文 SPEECH REPORT  |   |         |
| 海底をわたる風 〜ボスポラス海峡横断鉄道トンネル建設工事〜<br>Wind coursing through the Seabed — Marmaray Project  | 今石 尚<br>By T. IMAISHI                   | 19      |
| 論文・報告 PAPERS  |   |         |
| 1. 四国の高速道路における耐候性鋼橋梁の現状<br>古川<br>The present condition of the weathering steel bridge in the highway o<br>By S. FURUKAWA, H. YAMASHITA, M. O                          |   | 27      |
| 2. 耐候性鋼橋梁の腐食損傷による耐荷力劣化の評価および将来予復<br>古川<br>Evaluation and prediction of load carrying capacity of weathering<br>corrosion damage<br>By S. FURUKAWA, P. CHUN, H. YAMASH | ・全・山下・大賀<br>steel bridge subject        | ed to   |
| 3. 卓越周期が長い地震動によるモデル斜張橋の地震応答解析   | 梶田・王                                    |         |
| Seismic response analysis of the cable-stayed bridge model by using have long predominant period  By Y.K.A.   | ground motions whic<br>JITA and S. WANG | h<br>29 |
| 4. 石造アーチ橋の静的挙動を解明する2次元解析手法の検証 Inspection of a two-dimensional analytical method to elucidate the st   |   | 20      |
| stone arch bridge By T. OGURA, C. FUJI  | TA and T. YAMAO                         |         |

| 5.  | FE解析による鋼製支承のコンパクト化に関する一考察<br>玉井・園田・大塚・原田・鵜野   |          |
|-----|---|----------|
|     | A study on compactification of a steel bearing for bridge based on FE analysis By H. TAMAI, Y. SONODA, H. OTSUKA, T. HARADA and Y. UNO  | 31       |
| 6.  | SPH法を用いたアンカーボルトの引抜き耐力に関する基礎的研究<br>ハリヤディ・清成・宗本・園田  |          |
|     | A fundamental study on the tensile strength of an anchorage embedded in the concrete by SF By Hariyadi, K. KIYONARI, S. MUNEMOTO and Y. SONODA  | PH<br>32 |
| 7.  | 余震の発生確率を考慮した構造物の耐震性能評価に関する基礎的研究<br>木村・今村  |          |
|     | Seismic performance evaluation on mainshock-damaged structure with the influence of Aftershocks  By Y. KIMURA and K. IMAMURA  | 33       |
| 8.  | 個別要素法によるまくら木及びバラストの諸元がバラスト軌道の挙動に及ぼす影響の<br>検討 古川・堀川・清野   |          |
|     | Investigation of Effect of Railroad Tie and Ballast Properties on Ballast Track Behavior by using DEM  By A. FURUKAWA, R. HORIKAWA and J. KIYONO  | 34       |
| 9.  | Winkler基礎上の矩形板の曲げ問題における三次元弾性論と板理論との比較<br>志賀・名木野・足立・水澤・三上  |          |
|     | Comparison of three-dimensional theory of elasticity and plate theory for bending problem of rectangular plates on Winkler foundation  By A. SHIGA, H. NAGINO, T. ADACHI, T. MIZUSAWA and T. MIKAMI | 35       |
| 10. | 数値解析によるゴム製防舷材の耐荷性能評価に関する基礎的検討<br>宗本・園田・池邉・玉井  | ,        |
|     | A fundamental study on the load performance evaluation of the rubber fender by numerical Analysis  By S. MUNEMOTO, Y. SONODA, M. IKEBE, H. TAMAI  | 36       |
| 11. | UFC数値モデルを用いた高速衝撃を受けるUFC板の局部破壊モードのシミューレー<br>ション 千・別府・園田・武者   |          |
|     | Numerical Modeling of UFC and Local Failure Simulation of UFC plates subjected to High Velocity Impact By S. CHEON, M. BEPPU, Y. SONODA and H. MUSHA  | 37       |
| 12. | 中空部に砕石を詰めた空積みブロック擁壁の転倒条件の評価方法<br>土倉・山中・岡村   |          |
|     | Evaluation method of overturning condition for segmental retaining walls with aggregate contained in hollow parts of the units  By T. TSUCHIKURA, N. YAMANAKA and Y. OKAMURA                        | 38       |
|     |   |          |
| 13. | 山口県のレディーミクストコンクリート工場における標準配合の調査研究   |          |
|     | 平山・吉武・井上  |          |
|     | 平山。吉武。井上<br>Investigation on Mixture Proportions of Ready-Mixed Concrete in Yamaguchi<br>By J. HIRAYAMA, I. YOSHITAKE and M. INOUE  | 39       |
| 14. | Investigation on Mixture Proportions of Ready-Mixed Concrete in Yamaguchi   | 39       |

| 1 [      |  |    |
|----------|--|----|
| 15.      | コングリートの圧縮戦何時のAL先生学動に差りく頂房及計画の高か<br>鈴木  |    |
|          | Damage Evaluation of Concrete by Acoustic Emission in Core Test                          |    |
|          |  | 41 |
| 16.      | 熱処理による油汚染土壌浄化システムの乾燥加熱機構   |    |
|          | 神尾・蓬莱・亀井   |    |
|          | Mechanisms of the Heat Treatment-based Remediation System for Oil-contaminated Soil      |    |
|          | By Masahiro KAMIO, Hideto HORAI, Takeshi KAMEI   | 42 |
